

MY WINDFARM REPORT

On Friday, Year 5 and 6 had a man called Mr Purcell come into our school to talk about wind farms and how they operate. He told us how people get up into the wind mills. If they break down they get up the top by a big ladder. He showed us a picture of a blade getting moved to a wind farm.

He told us how they connect the wings to the pole. He said that they use a crane. He also told us that if it is too windy it is not safe to put a blade on and that construction would have to stop for safety reasons.
