

Tongala Preschool

Green Superheroes!

At the Tongala Preschool we are green superheroes – We even have special capes. Green Superheroes try to help the world not hurt it!

We have been working on ways that we can save energy at preschool, home and around our town.

What do we do?

- We have looked at all the appliances that we have that use energy. We realised that except for our telephone everything could be turned off at the wall when we aren't using it. So we always try make sure that everything is off at the wall at preschool and at home.

Working with the Community

- We joined up with our Community Bank and they are going to make sure that all our light bulbs are compact fluorescent light bulbs instead of incandescent.

Telling Everybody!

- We know that we are saving energy but we think that its really important to tell everyone else in our community.
- We tell our families about what we've done when we get home. We also put our tips in the newsletter. We have had parents comment about their children turning off all the lights in the house to save energy!

Telling Everybody!

- We have been making posters to go home and around the town of ways to save energy. They are at lots of different shops and services.

- We are also putting our tips in the community newspaper.

We may be little people.....

But we know that we can
make a BIG difference to our
world.

You can too!
