

Investigation 2 Pros and cons

Using the pairs of cards you created in Investigation 1, write a list of pros and cons for each pair.

Here's an example to get you started.

Incandescent globe

- Cheap (pro)
- Breaks quickly (con)
- Uses lots of electricity (con)

CFL globe

- Expensive (con)
- Lasts a long time (pro)
- Uses little electricity (pro)

Fill in the spaces below for each matching pair and any extra examples you included. For each pair, is there a clear winner? (Do the pros outweigh the cons)?

Vacuum	Broom
Car	Bike
TV	Book
Air-conditioner	Fan
Electric toothbrush	Toothbrush
