OWNER RESPONSIBILITY

Before you request a service to the product under this Warranty please check the following to save money. You will have to pay for service calls in relation to the product and any repair made to the product that is not related to a manufacturing defect in the product.

POWER: Check that the power plug is pushed in and the power is switched on. If there is still no power, check whether there is power at the point by using another appliance. Also check that the circuit breaker has not been tripped.

USER CONTROLS: Ensure that all user controls are correctly set.

INSTALLATION: Confirm that the product is correctly installed. If necessary consult with the installer.

OBSTRUCTIONS: The Warranty does not cover problems caused by dirty air filters, air flow obstructions in the indoor or outdoor section of the product, leaves, dust, or foreign objects blocking vents and coils. These are important points to be kept under observation and should be checked regularly. Blocked drainage pipes can cause condensate water to leak out of the product instead of draining from it. Check in humid weather. Regular checks for and clearance of obstructions are the owner's responsibility.

RELOCATION: This Warranty does not cover relocation or re-installation and set up of the product.

BATTERIES: This Warranty does not apply if the product is damaged by the use of exhausted, leaking or used batteries or fails to function correctly as a result of the use of such batteries.
