Critical Information Summary: Origin Home Broadband Opticomm

Information about the service

Service Description

These Origin Opticomm plans are delivered using the Opticomm infrastructure through Fibre to the Premises (FTTP) technology to deliver broadband to your home. Origin Opticomm plans include an unlimited data allowance and an optional home telephone service and require that payment is made via direct debit.

Minimum Term

All Origin Opticomm plans are monthly plans with no lock-in contract.

Early Termination Fee

Termination of your service can be requested at any time by you on 30 days' notice to us. There is no early termination fee payable on a no lock- in contract.

Information about pricing

Your minimum monthly charge and total minimum plan cost:

Plan Name	Speed Tier	Monthly Included Data	Minimum Total Cost*	Recurring Monthly Charge
Everyday Opticomm	25/10	Unlimited	$88.00	$83.00
Experience Opticomm	50/20	Unlimited	$100.00	$95.00
Enthusiast Opticomm	100/20	Unlimited	$110.00	$105.00
Enthusiast+ Opticomm	100/40	Unlimited	$115.00	$110.00
Super Fast Opticomm	250/25	Unlimited	$125.00	$120.00
Ultra Fast Opticomm	1000/50	Unlimited	$135.00	$130.00

*Includes the $5 activation fee. If you bundle your broadband service with a phone service or purchase equipment, your monthly costs may be different.

Service and Plan Availability

Origin Opticomm is not available at all locations or to all premises. Further qualification checks will be required to determine the service available to you. To check what's available to you please visit **www.originbroadband.com.au.**

There may be technical reasons that affect our ability to provide a connection at your address. Until it's connected Origin cannot guarantee that the service can be installed at your premises. Your available plan will depend on the Opticomm access type of your connection.

Typical evening speeds are based on customer averages between 7pm and 11pm and are not a guaranteed minimum and you can see the latest typical evening speeds at **originenergy.com.au/speed**

The Origin Opticomm plans offer broadband data access at typical minimum download speeds as shown in the table above and are only available to residential customers for personal or domestic use. You can request to find out what your maximum line sync speed will be once connected.

Activation Fee

There is an upfront fee of $5 to activate your service. This will have to be paid upfront.

Origin Acceptable & Fair Use Policy

The Origin Acceptable & Fair Use policy applies to excessive and unreasonable use of this service. Further details on the Origin Acceptable & Fair Use policy can be found at **originenergy.com.au/fair-use**

Equipment Required

You will need a suitable Opticomm ready and approved modem to use this service. Your modem will need to be VoIP enabled if you want to make use of a voice service. There is no modem included with this plan; however, Origin Broadband can provide you with a Opticomm approved modem if you'd prefer.

The cost of a ZTE H1600 is $151.00 plus a delivery charge of $20.00.

The cost of an Eero 6+ is $145.00 plus a delivery charge of $20.00.

Modem and delivery fees will be payable upfront prior to the modem being sent out.

Can I change my speed later?

You can change your plan at any time for no fee. If upgrading your plan before the end of your monthly billing cycle, you will need to pay the difference between your current plan and new plan. If you wish to downgrade your plan, please note we do not prorate refunds on plan downgrades.

Installation

If you're in a new development and not already connected to the Opticomm network, an Optical Network Termination Unit (ONT) and fibre lead-in cable will need to be installed prior to the provisioning of the service. There may be a charge for the ONT installation. This will be payable upfront, and we will let you know what this cost will be in advance. You must obtain the consent of the property owner to have the Opticomm FTTP ONT installed.

If you are not the property owner, you will need to obtain the property owner's written consent (dated and signed) and be able to provide that to us upon request. Any cabling that's required in your premises beyond the Network Boundary Point is your responsibility, as is the provision of a suitable, permanent 240V AC power outlet, and you will need to pay any associated costs.

If you're in a premises where the ONT and Fibre lead-in cable has been installed but has never been connected to the Opticomm network, there may be an additional once off fee of $300 that will need to be paid upfront. We will advise you if this fee is applicable to you.

Origin Broadband Bundle option

Eligible Origin Energy customers (i.e., electricity, gas, LPG, or hot water customers) who sign up for a new Origin Broadband service will receive a discount off the monthly charge for their Opticomm plan. The discount is a minimum of $10.00 each month and will appear as a credit against the broadband monthly access fee for as long as the relevant energy product remains active (which for LPG customers, means purchasing an LPG cylinder at least once every 18 months). The discount is not available in conjunction with other Origin offers and may be withdrawn at any time. If this happens, we will let you know.

The bundle offer is optional, and you will not be required to have an active energy account with Origin to sign up to any of our Broadband plans.

Relocations

There are no Origin Broadband fees to relocate your service in most circumstances, and your current agreement will continue.

If you are relocating to a Opticomm serviceable address, Opticomm may charge new installation, new development, and connection fee to connect your premises to the Opticomm Network.

If you are relocating to a non-Opticomm serviceable address, there might be an associated new line or development connection or nbn™ fees.

We will advise you in advance if any of these fees apply to you.

Other information

Usage Information

You can obtain information about your usage by contacting our Customer Service on 1300 980 711 or email **help@originbroadband.com.au**

Billing

When you first start a plan or change your plan part way through a billing period, your first bill may have additional charges. It will include your minimum monthly charge in advance and may also include other charges such as new development fees, new line activation fees and setup fees.

Once your broadband service is activated, billing will begin, and we'll issue your first bill. You will need to pay your bill by direct debit from your credit/debit card or from your bank account.

To see the applicable merchant and paper invoice fees please see **originenergy.com.au/internet-fees**
